OBJECTIVE

Computer science graduate with a strong foundation in programming, software development, and data analysis. Proficient in Python, C++, Java, SQL, and web technologies, with experience in building and optimizing software solutions. Familiar with machine learning concepts, database management, and Linux system operations, with hands-on experience in real-world projects. Comfortable with version control using Git and developing interactive web applications using HTML, CSS, and JavaScript. A quick learner with a problem-solving approach, eager to apply technical skills and contribute to impactful projects.

EDUCATION

Amrita Vishwa Vidyapeetham <i>B.Tech in Computer Science and Engineering (CGPA: 7.27)</i>	Bangalore, Karnataka 2021 – 2025
Sri Chaitanya PU College <i>XII (Percentage: 94.1%)</i>	Ballari, Karnataka 2019 – 2021
Oxford High School <i>X (CGPA: 9.5)</i>	Narasaraopet, Andhra Pradesh 2018 – 2019

SKILLS

Coding Languages: C++, Python, Java, Web Development: HTML, CSS, JavaScript
Data Structures, Data Analysis, Data Visualization, Machine Learning, SQL
Version Control: Git
Operating Systems: Linux(Bash Scripting, File System, User & Permission Management)
Soft Skills: Communication skills, Adaptability, Creativity, Teamwork

PROJECTS

Prompt-Guided-Image-Captioning-with-VGG16	AUG–DEC 2024
Developed an image captioning system using VGG16 and YOLOv8 for generating captions based on images and natural language queries. Collected and annotated video frame data from the Eye-Tracking Lab for training. Built a Flask-based interface, achieving 96% accuracy in activity detection for surveillance and media analysis.	
Detecting Sugarcane Leaf Diseases Using Deep Learning Techniques	MAR–JUN 2024
Developed an automated sugarcane leaf disease detection system using deep learning, achieving 94% accuracy. Used the Sugarcane Leaf Disease Dataset from Kaggle for training. Applied EfficientNet with self-attention layers for classification and evaluated multiple CNN models.	
Restaurant Management System	SEP - DEC 2022
Developed a Restaurant Management System using HTML, CSS, JavaScript, PHP, and SQL to handle customer orders, menu management, and table reservations. Implemented a database to store customer and management information. Designed a web interface for users to browse the menu, place orders, and book tables.
